Mannington has created premium flooring products. Building upon broad research and deep experience, we create true choices that work for acute and long term care facilities, senior living, and medical offices.

Only Mannington has the experience in offering a broad portfolio of products through one point of contact. This history translates to a reliable infrastructure and deep accountability all along the lifecycle of your project. From specification to delivery, from installation to reclamation.

Our resilient sheet, performance broadloom and modular carpet, LVT, VCT, superior formulation rubber, and through-construction porcelain work together to enhance beauty, reduce patient anxiety, and serve the staff whose lives are dedicated to serving others. All with a smaller environmental footprint.

HEALTH + CARE
SHAPE A SPACE OF DIGNITY.

COMPASSION AND CONNECTION.

FEATURED PRODUCTS Woven and Perennial sheet flooring
We know that healthcare facilities are not “one product fits all” environments. Finding the right flooring for any space is linked to understanding how that space will be used. We also know that the needs of healthcare design are always changing, so products must be re-evaluated on a project-by-project basis.

As manufacturers, we believe this is an opportunity to build trust. So we start with evidence-based design, trustworthy research, and user experience so each product is made with its use in mind.

But we then go deeper, subjecting each product to rigorous performance testing based on its potential application - and requiring that our full portfolio of beautiful, durable, sustainable products work together seamlessly.

Every flooring solution from a single point of contact. Choices that Work.
No single product category can meet the many needs of healthcare environments. So instead of taking a one-floor-fits-all approach, we offer a broad product portfolio from one point of contact, and consult with our customers to help determine the right product for every space.

# The Right Product for Every Application

## Heterogeneous

- Easy to maintain
- Stain-resistant
- Enhanced slip retardance when compared to standard resilient floors
- Broad portfolio of aesthetics

<table>
<thead>
<tr>
<th>Material</th>
<th>Waste (Sq Yds)</th>
<th>Material Waste (%)</th>

## Homogeneous

- Through-chip construction
- Durable construction resists cuts and gouges
- Resistant to wear, soiling and discoloration
- Quantum Guard® HP patented wearlayer
- High roller mobility
- Single-layer composition for sterile environments
- Safety floor options available
- Post-consumer recycled content

## Carpet

- Modular and broadloom
- Broad portfolio of aesthetics
- Advanced performance backing with high recycled content
- 6.6 nylon resists crushing and matting, staining, and soiling
- Stain-defying XGuard®
- Bleach-resistant ColorSafe®
- Warranties for wick-back staining, moisture resistance, delamination and wear
- 6,6 nylon resists crushing and matting, staining, and soiling
- Stain-defying XGuard®
- Bleach-resistant ColorSafe®
- Warranties for wick-back staining, moisture resistance, delamination and wear
- Available in 6', 9' and 12'
- 9' roll for corridors = less waste, lower cost, fewer seams
- Engineered to last
- Quantum Guard® HP patented wearlayer
- Beautiful realistic and abstract aesthetics
- Sophisticated colors
- Tile and plank formats in multiple sizes
- Design flexibility
- Ease of installation
- Engineered for durability
- Quantum Guard® HP patented wearlayer
- Recycled content
- Renewable resource content

## VCT

- Performs beautifully
- Low maintenance
- Through-pattern construction
- Economical and durable
- A wide palette of neutral and vibrant colors
- Post-consumer recycled content

## LVT

- Beautiful realistic and abstract aesthetics
- Sophisticated colors
- Tile and plank formats in multiple sizes
- Design flexibility
- Ease of installation
- Engineered for durability
- Quantum Guard® HP patented wearlayer
- Recycled content
- Renewable resource content

## Rubber

- Broad portfolio of tiles, sheet, stair treads, wall base, and finishing accessories
- Comfort underfoot
- Sync color coordination system
- Superior indentation resistance, color retention, scratch, and slip-resistance
- Acoustic properties
- Self-waxing feature for superior appearance retention
- Profile designs allow for enhanced cleanability
Flooring transition strips can create a hazard in healthcare – a breeding ground for infection and bacterial growth, especially when a contaminating spill goes underneath a transition and is missed by cleaning and disinfection. Transition strips also create mobility issues and unnecessary obstacles for patients being transported on gurneys, for recovering patients with IV towers, and for staff transporting heavy equipment.

So Mannington created Seam + Advantage. Leveraging our years of experience manufacturing hard and soft surface flooring, we have designed our portfolio of products – resilient sheet, LVT, and performance broadloom carpet – to be chemically welded to each other. Creating truly seamless transitions from surface to surface.

Eliminating transition strips through the entire facility. Better for infection control, better for patient mobility, better for long-term performance.

The only lifetime warranty for seam integrity between different flooring types. Warranty covers delamination, edge ravel, zippering, and wick-back staining.
It’s simple. To be up to Mannington’s standards for performance, each flooring product must deliver maintenance, long-term durability, and specific technologies designed for the demands of commercial environments. So we design these priorities into our products, from the ground up.

**mCARE®**
mCare® antimicrobial treatment, applied to product face and carpet backing, inhibits the proliferation of fungi and bacterial growth – helping reduce the exposure that hospitals face from secondary infections.

![AATCC 174 passed](image)

**COLORSAFE®**
Proprietary bleach-resistant technology helps maintain carpet’s appearance for years, even under tough cleaning conditions.

**XGUARD®**
Stain-defying technology gives protection against spotting and stains in our carpet products.

**NYLON 6,6**
Nylon 6,6 performance carpet fiber gives the best appearance retention and resistance to soil penetration, wear, staining, matting and crushing in high traffic areas.

**INTEGRA HP®**
Performance broadloom backing with seamless chemical welding creates an impermeable moisture barrier, with no wick-back staining. Lower profiles for safer foot and rolling traffic. Lifetime warranty for edge ravel, zippering, and delamination.
The highest performance commercial urethane finish in the industry. The patented aluminum oxide UV cured wearlayer eliminates the need for polish, while enhancing durability, cleanability, appearance retention and slip retardance when compared to standard resilient floors.
A HEALTHY ENVIRONMENT

MORE SUN, LESS WATER

Having one of the largest solar arrays in the flooring industry and being at the vanguard of energy conservation prompted the US Secretary of Energy to name us a leader in industrial energy efficiency.

ONE OF THE INDUSTRY’S LARGEST SOLAR ARRAYS

3.3 ACRES
1,000,000 KILOWATT HOURS ANNUALLY

Through investment in technology and a continued emphasis on efficiency improvements, we continue to reduce raw material, energy, and water usage in our manufacturing processes.

OUT OF LANDFILLS

We actively seek out waste streams that clog America’s landfills, looking for innovative ways to incorporate them into our products. Reclaiming post-consumer carpet and VCT from other flooring companies, as well as reclaiming high volume waste from other industries.

DRYWALL INTO FLOORING

On average, 5 tons per week of the construction industry’s largest waste stream finds new life in our VCT products.

RUBBER TIRES INTO FLOORING

Our Reset rubber flooring tiles contain 71-91% recycled tires.

OTHER WASTE STREAMS USED

PHONEBOOKS MAGAZINES WINDSHIELDS GLASS
FEATURED PRODUCT: Yeats
As part of our ongoing commitment to offer sustainable choices, we have invested in vinyl alternative products including rubber tile and sheet flooring, and our rEvolve non-vinyl carpet backing with 40% recycled content, all with Mannington’s commitment to performance.

<table>

<tr>
<td>VINYL ALTERNATIVES AVAILABLE</td>
<td>Certifications help navigate the world of green marketing claims. So we invest in ISO-14001 and environmentally preferable product certifications including NSF/ANSI-140, and NSF/ANSI-332. All of our products contribute to multiple LEED and Green Globe credits.</td>
</tr>
</tbody>
</table>

**LOOP®**

We have a responsible end-of-life plan for the products we manufacture. Through our LOOP® reclamation, we take back post-consumer carpet and closed-loop recycle it back into carpet. Additionally, we have closed-loop recycling processes in place for our VCT and LVT products and produce the only carpet-to-hard surface flooring - resilient sheet with 35% recycled content.
We are a fourth generation, family owned company with manufacturing facilities in eight communities across America. We are the only US manufacturer of homogeneous sheet and one of two domestic manufacturers of heterogeneous sheet and the leading manufacturer of commercial LVT.
WHAT MAKES A GREAT HEALTHCARE SPACE?

An environment that helps calm, heal, and restore patients – while inspiring, sustaining, and serving the people who work there. The same values drive us every day.

Like all well-designed healthcare experiences, our products achieve the highest standards of performance, while also creating a beautiful aesthetic.

We know what healthcare designers know: that great service is good business.

So we are obsessed with performance, environmental quality, comfort, sustainability, and, of course, design – down to the details.

Our unique and innovative product mix is designed to work together, offering choices that work for any healthcare project.
